Practical – IV

Roll No.: T038	Name: Akansha Pritam Ranade
Class: TYIT	Batch: 1
Date of Assignment: 04-09-2026	Date/Time of Submission: 04-09-2026

A. Connect and Understand the Data

- Open Tableau and create a new workbook.
- Connect the netflix.csv file to Tableau.

- View all the columns in the dataset.

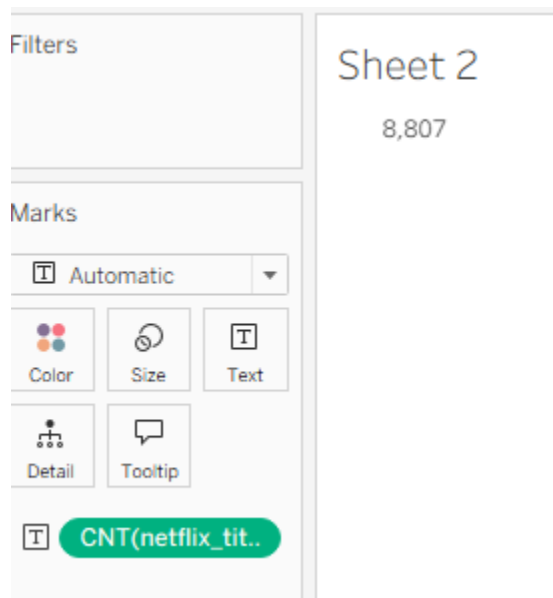

netflix_titles.csv		12 fields 8807 rows		100	→	rows	⚙	▼
Name netflix_titles.csv				Abc	▼	Abc	▼	
Description				netflix_titles.csv		netflix_titles.csv		
No description available.				Show Id		Type		
Fields				s1		Movie		
				s2		TV Show		
				s3		TV Show		
				s4		TV Show		
				s5		TV Show		
				s6		TV Show		
				s7		Movie		

Type	Field Name	Physical Table	Remote Field ...
Abc	Show Id ▼	netflix_titles.csv	show_id
Abc	Type ▼	netflix_titles.csv	type
Abc	Title ▼	netflix_titles.csv	title
...	...	netflix_titles.csv	director

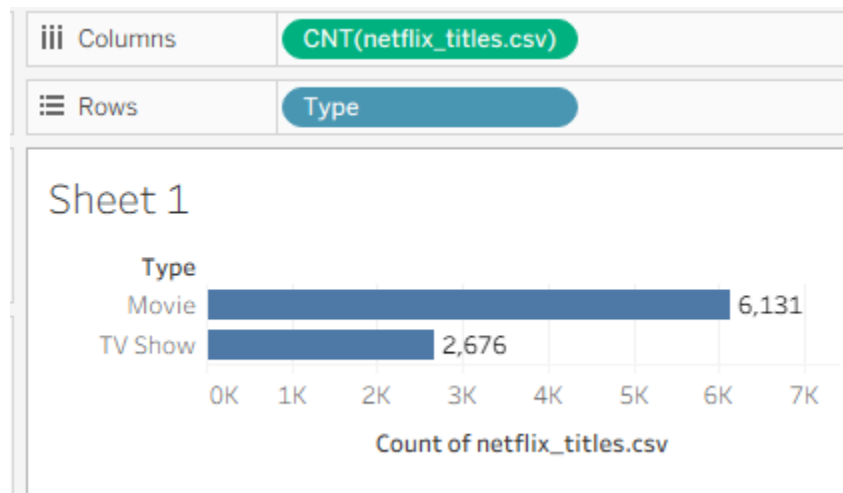

- Identify which columns contain text, numbers, and dates.

netflix_titles.csv Country	netflix_titles.csv Date Added	netflix_titles.csv Release Year
United States	September 25, 2021	2020
South Africa	September 24, 2021	2021
null	September 24, 2021	2021
null	September 24, 2021	2021
India	September 24, 2021	2021

- Find the total number of records in the dataset.

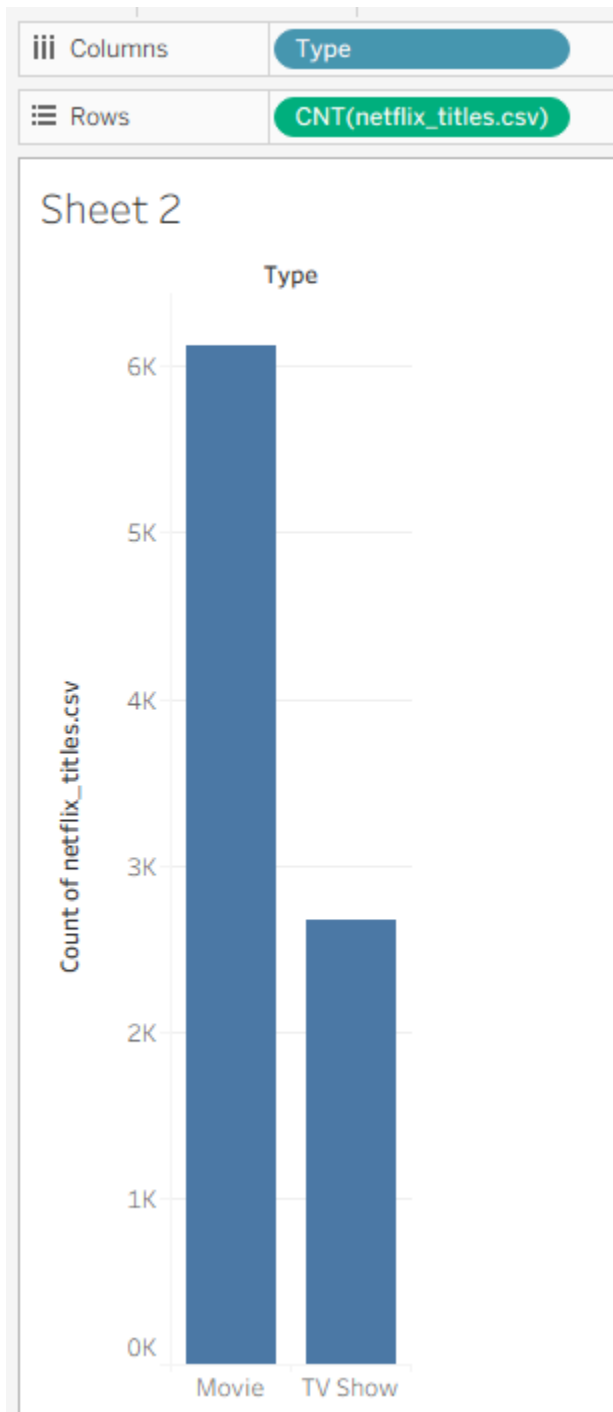

- Find the total number of Movies and TV Shows in the dataset.

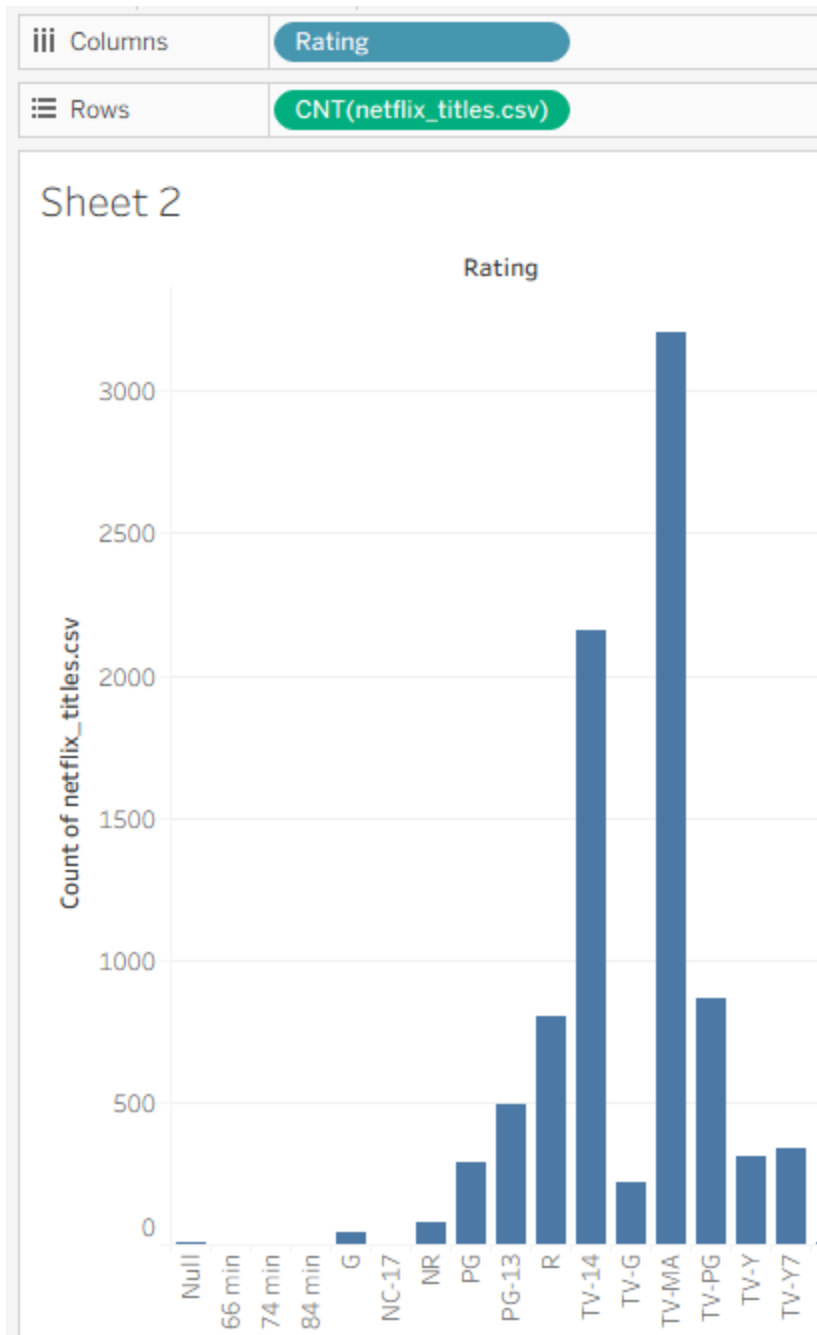

B. Create Different Visualizations

- Create a bar chart to compare the number of Movies and TV Shows.

- Create a bar chart to show the number of titles for each Rating.

- Create a horizontal bar chart to show the top 10 countries with the highest number of Netflix titles.

- ☒ Canada, France, United States
- ☒ Canada, Germany
- ☒ Canada, Germany, France, United States

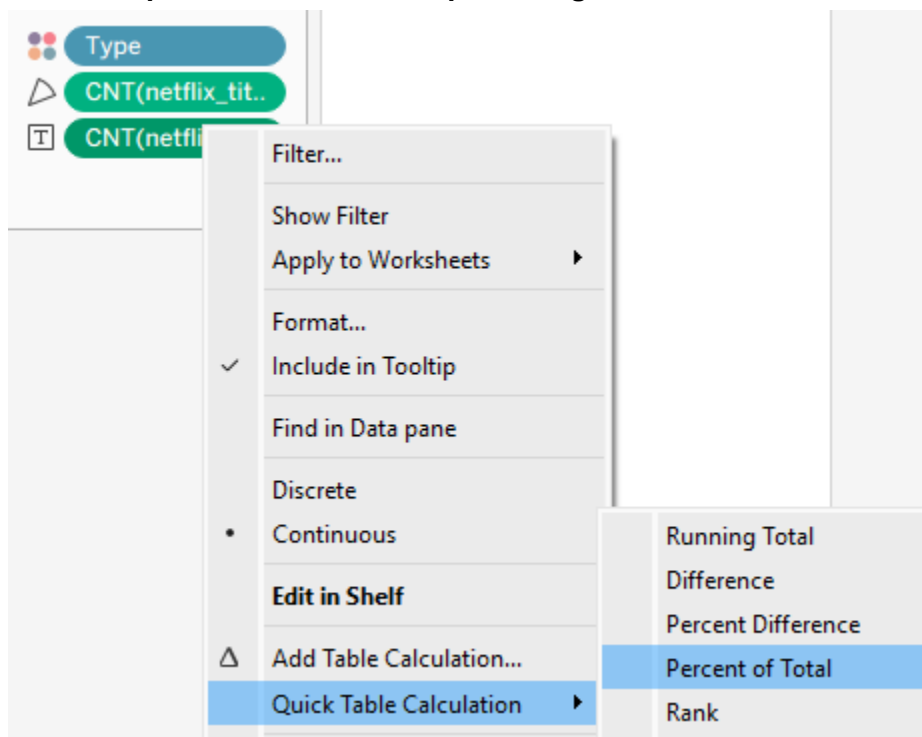

All None

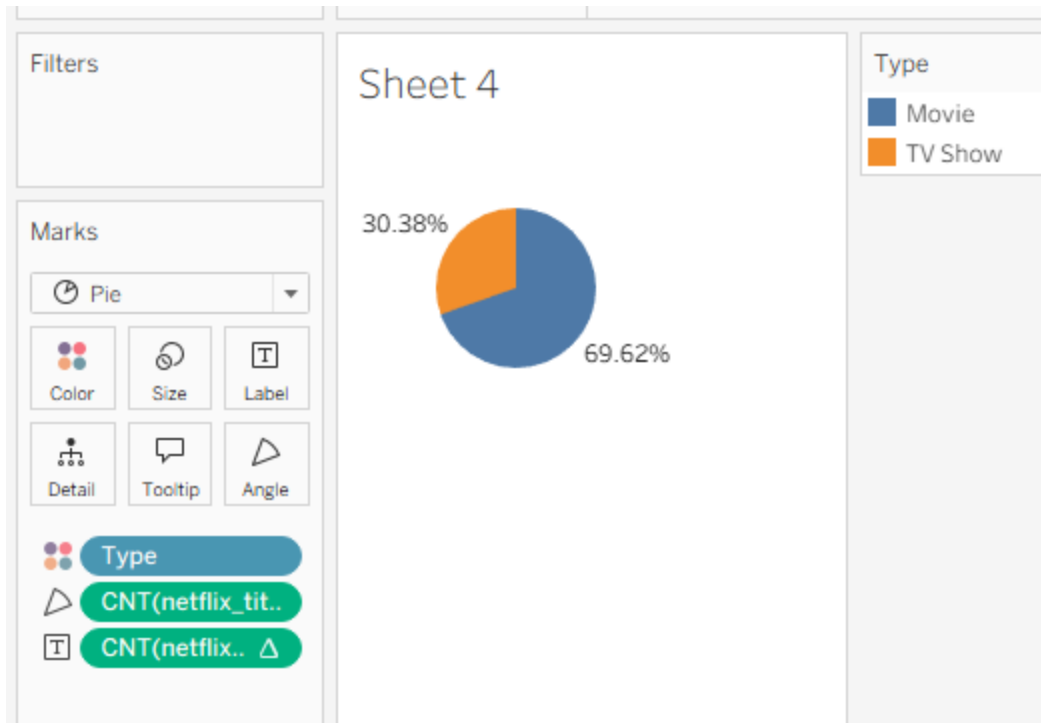

- Create a bar chart to show the top 10 Genres with the highest number of titles.

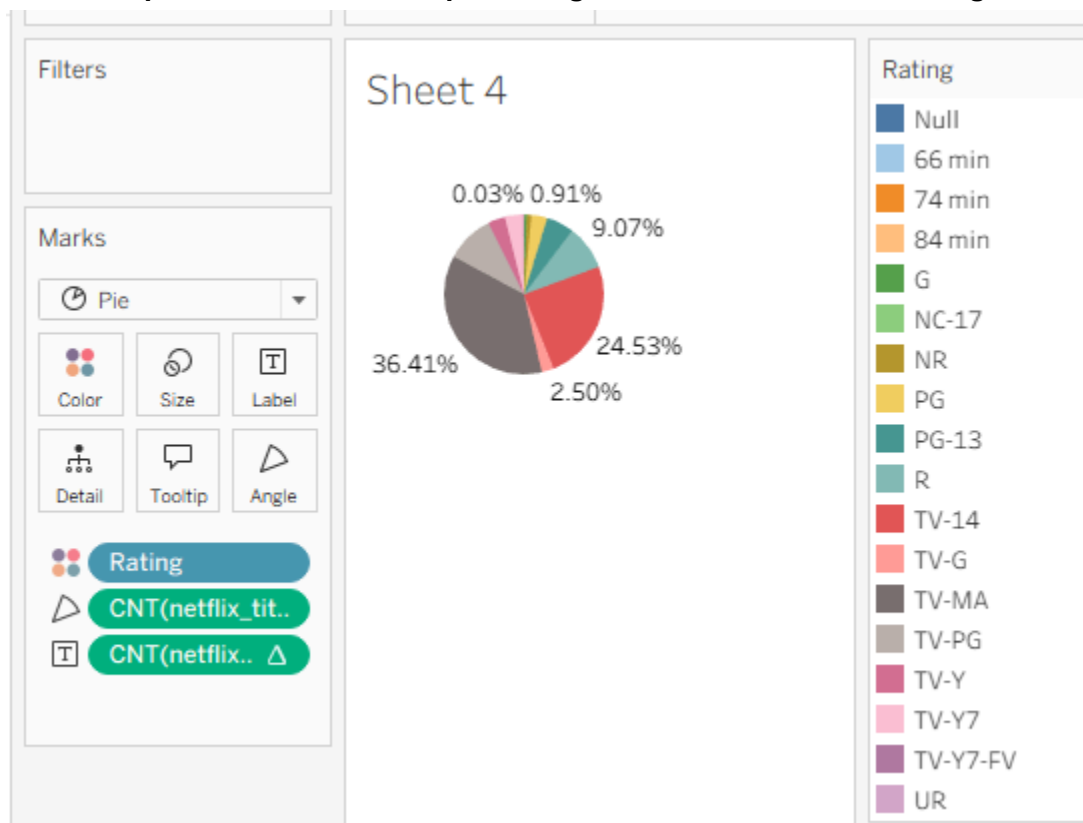

- Create a pie chart to show the percentage of Movies and TV Shows.

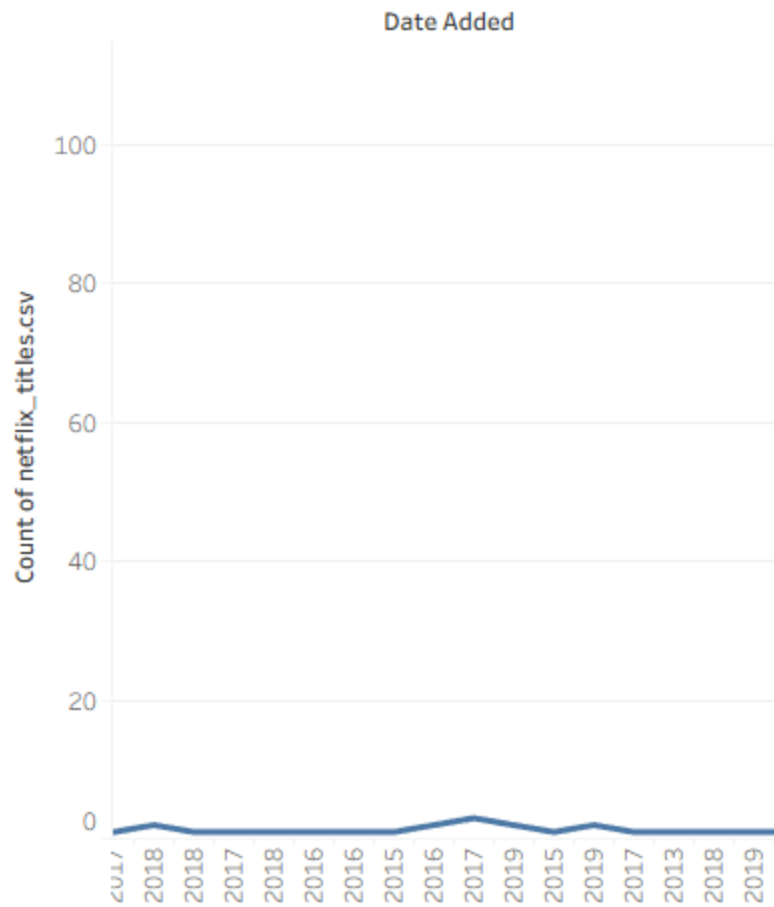

- Create a pie chart to show the percentage of titles for different Ratings.

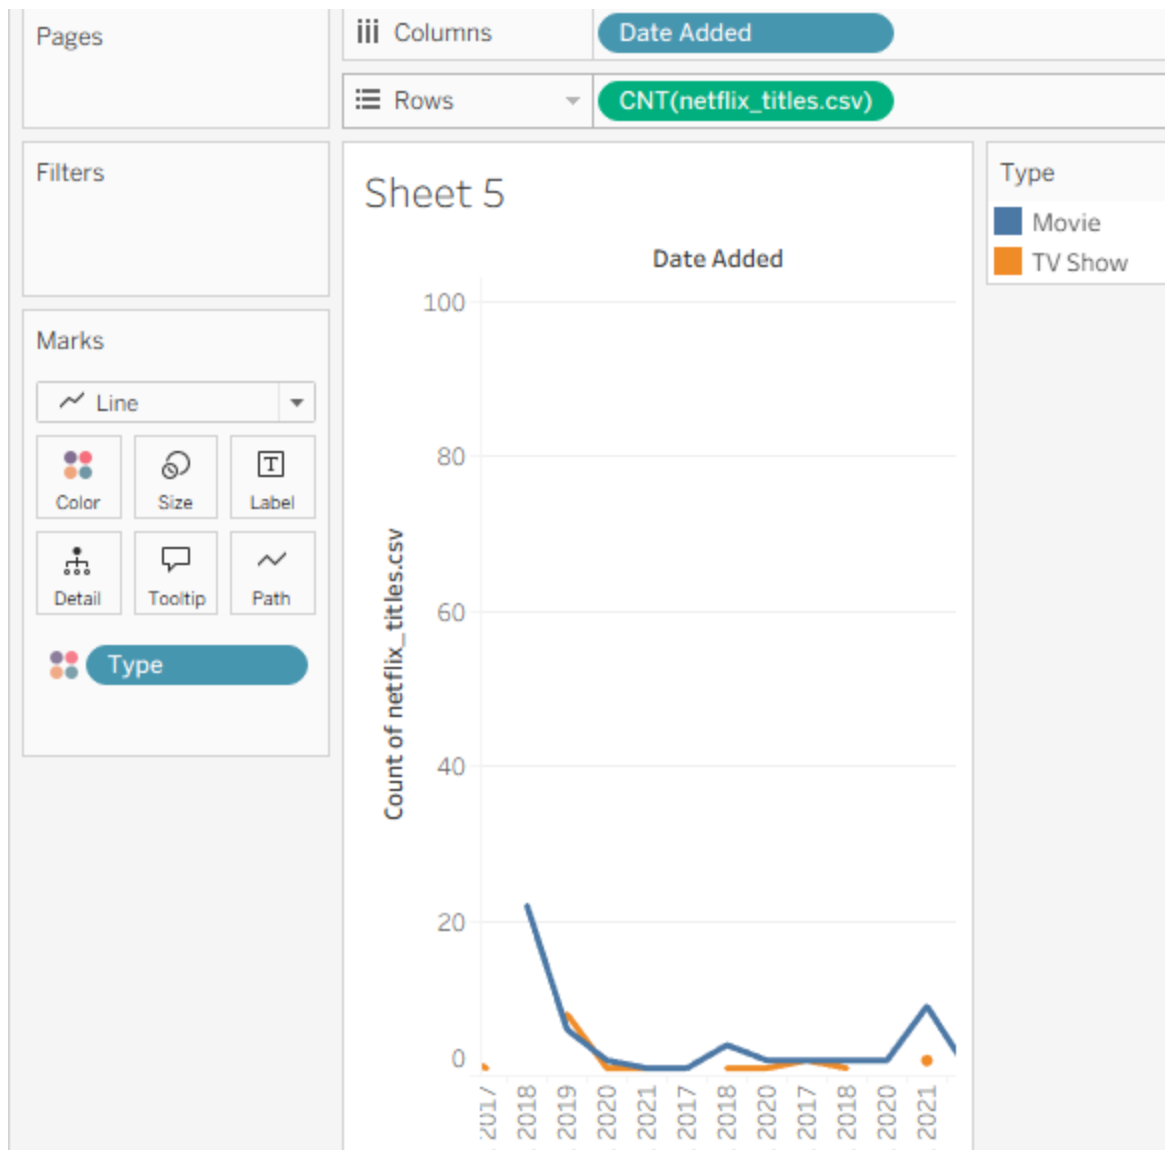

- Create a line chart to show the number of Netflix titles added in each year.

Columns	Date Added
Rows	CNT(netflix_titles.csv)

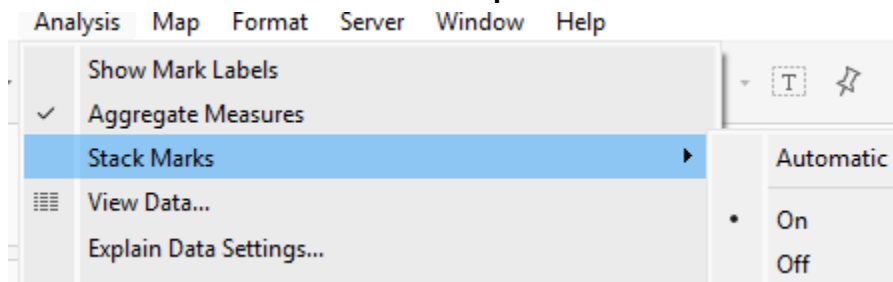

Sheet 5

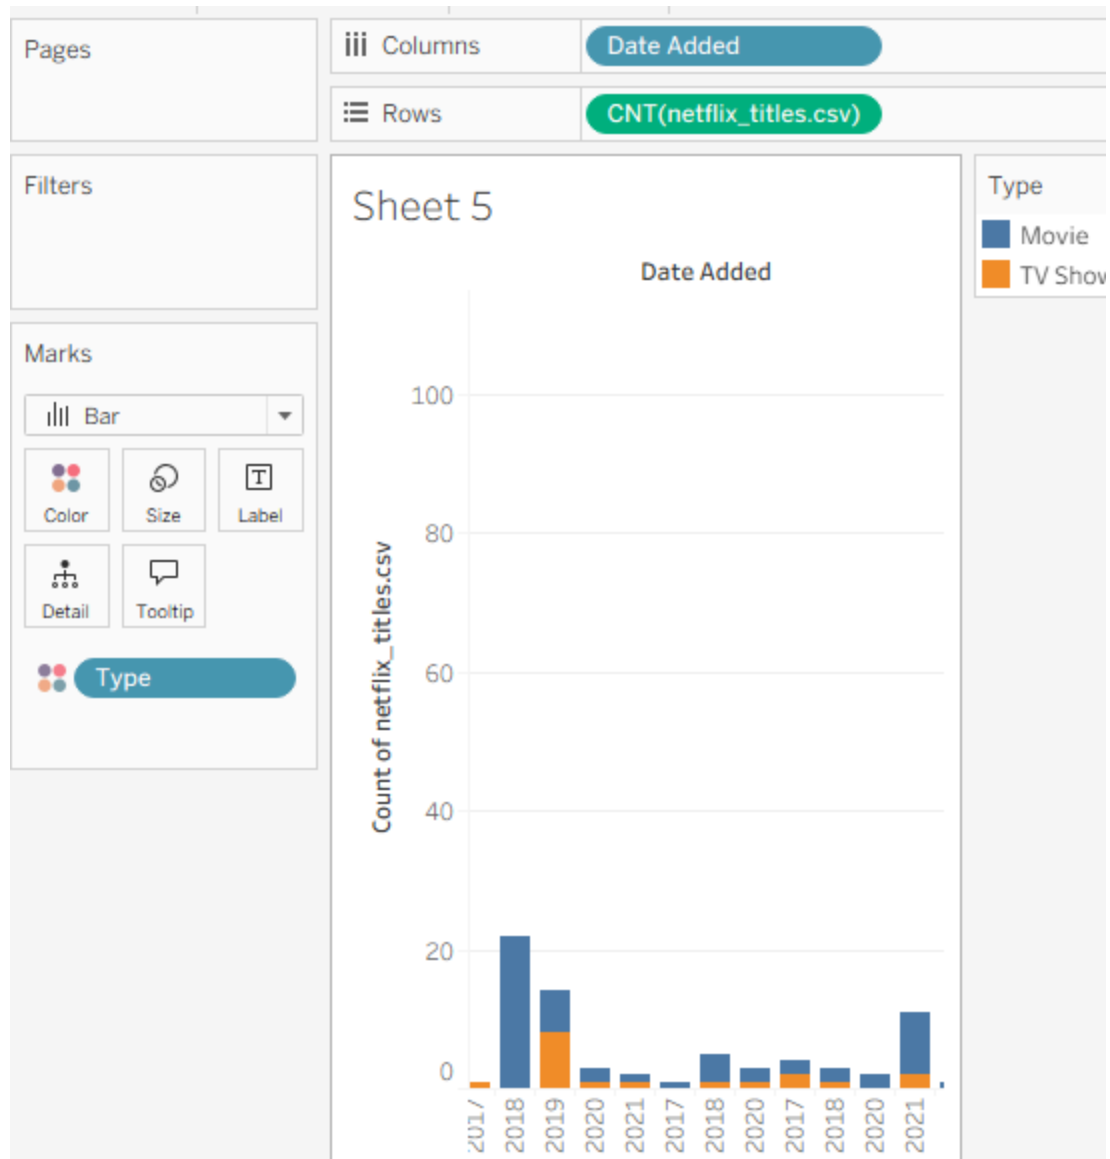

- Create a line chart to compare the number of Movies and TV Shows added over the Years.

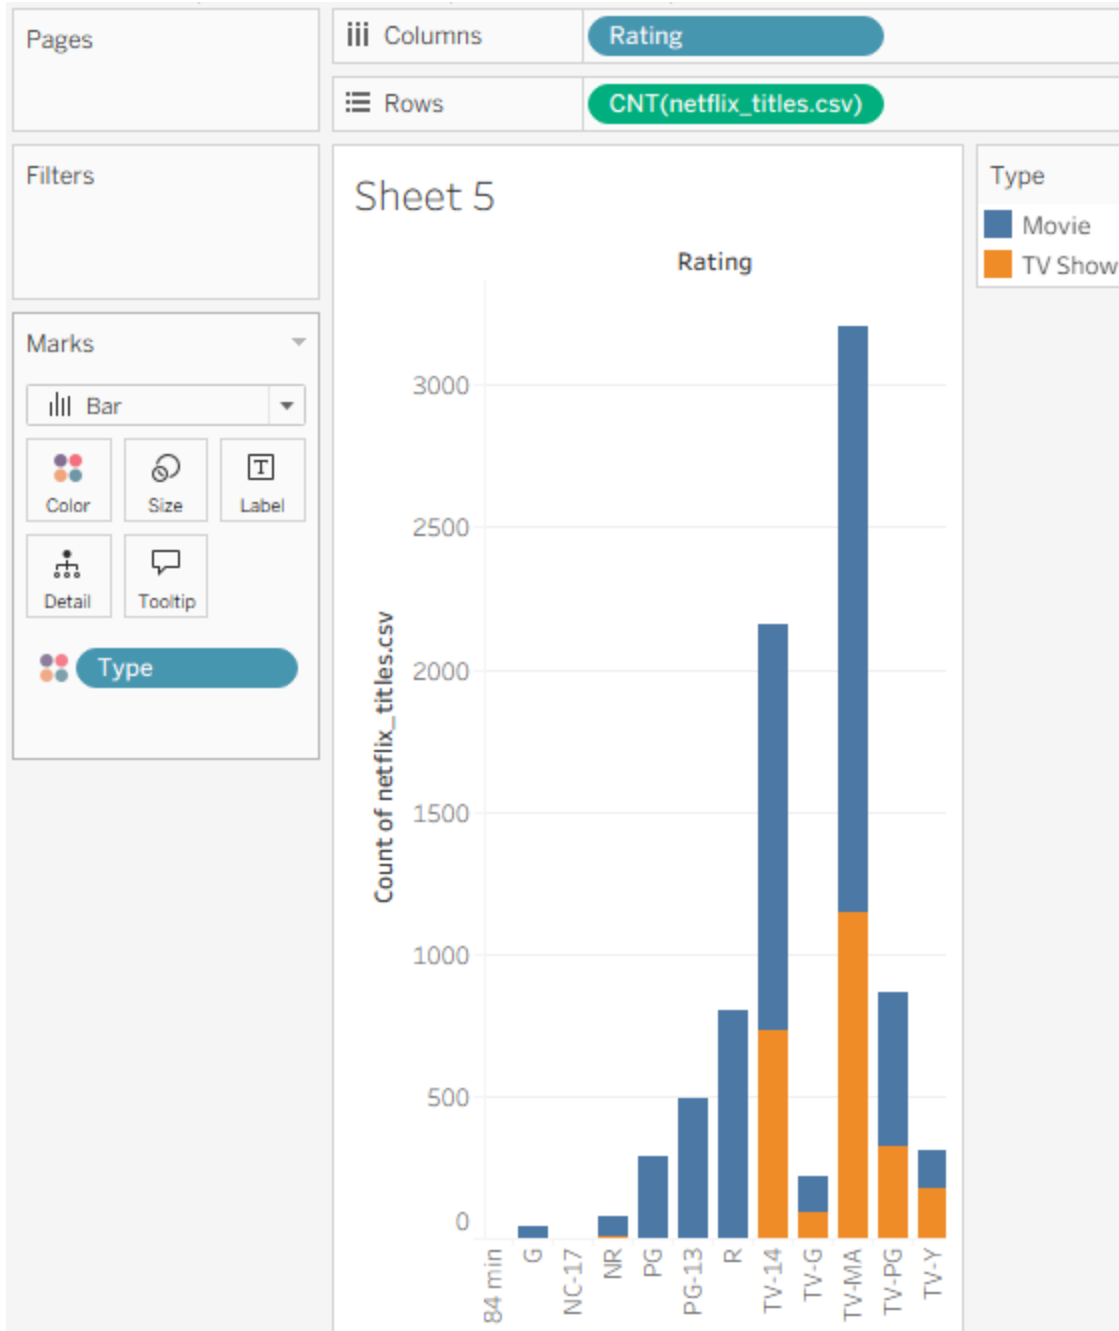

- Create a stacked bar chart to compare Movies and TV Shows for each year.

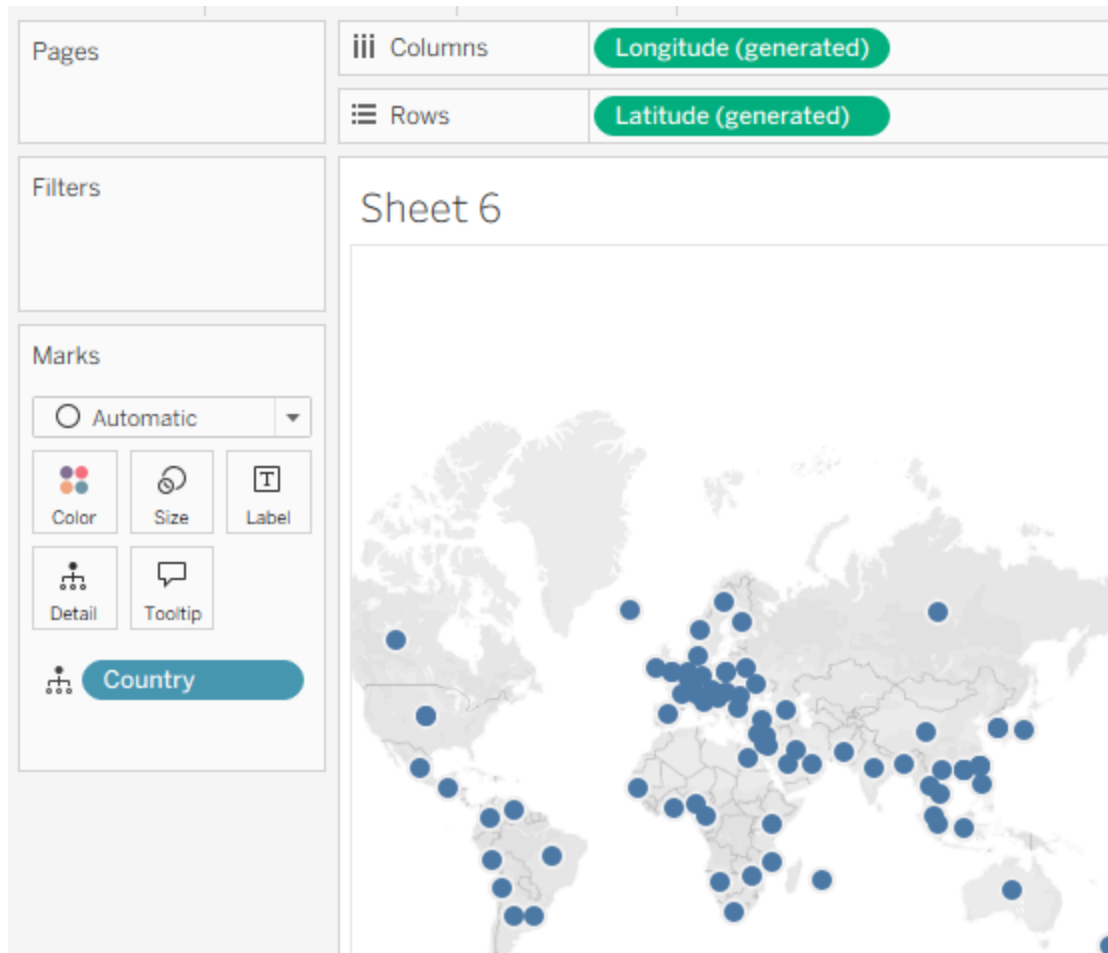

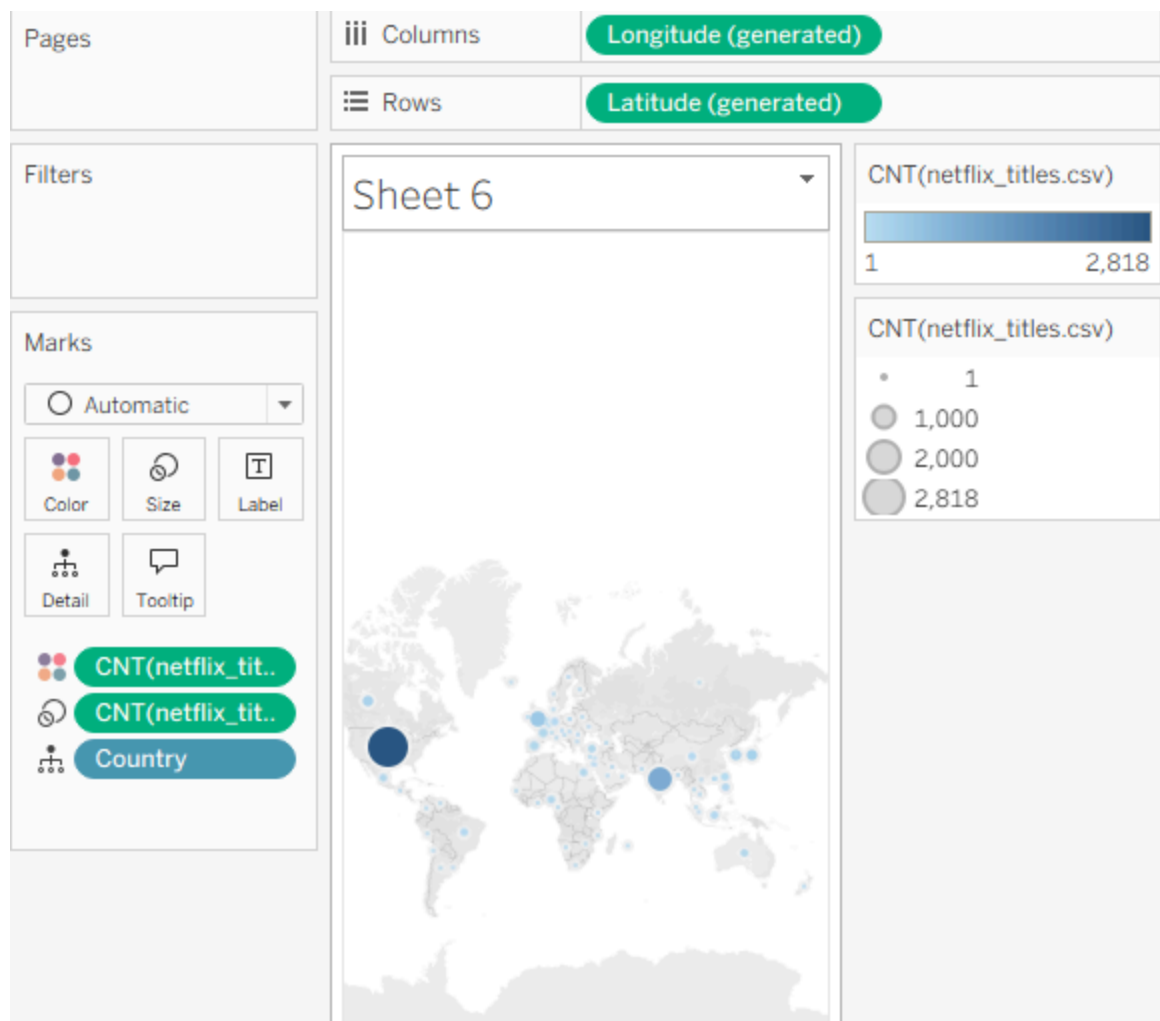

- Create a stacked bar chart to compare Movies and TV Shows for different Ratings.

- Create a map to show the countries from which Netflix titles are available.

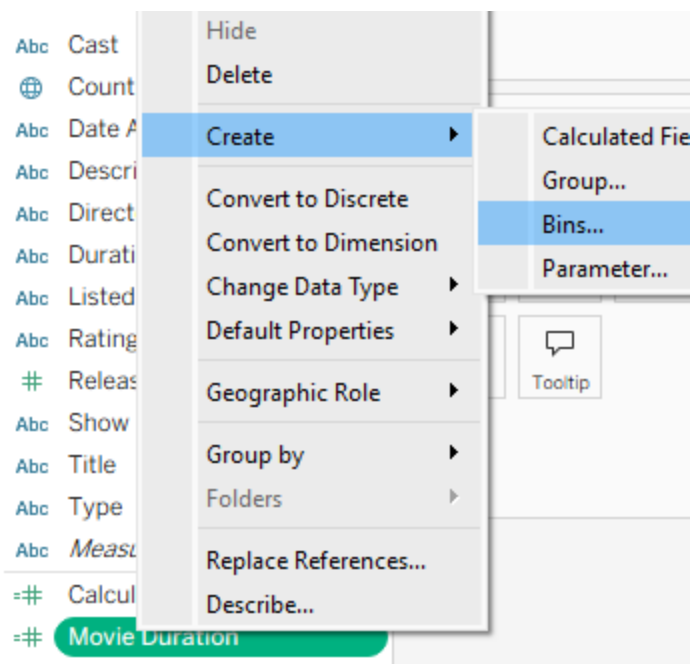

- Use the map to show the number of Netflix titles for each country.

- Create a histogram to show the distribution of Movie durations.

- Add a Year filter to view titles from a selected year.

The screenshot shows the Tableau interface with the following components:

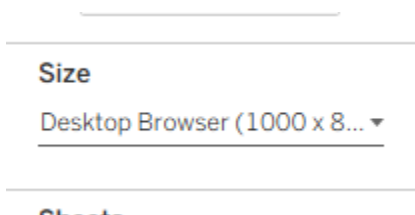

- Columns Shelf:** Labeled "Columns" with a column icon.
- Rows Shelf:** Labeled "Rows" with a row icon.
- Filters Shelf:** Labeled "Filters" and contains a pill labeled "YEAR(Date Added)".
- Marks Shelf:** Labeled "Marks" and contains a dropdown menu set to "Automatic". Below the dropdown are icons for "Color", "Size", "Text", "Detail", and "Label".
- View:** A blank view titled "Sheet 8" with a "Drop field here" prompt.
- Field List:** On the right, under the heading "YEAR(Date Added)", a list of years from 2008 to 2015 is shown. The years 2009, 2011, 2013, and 2015 have checkboxes that are checked. The year 2009 is highlighted with a grey background.

- Use two or more filters together and observe how the charts change.

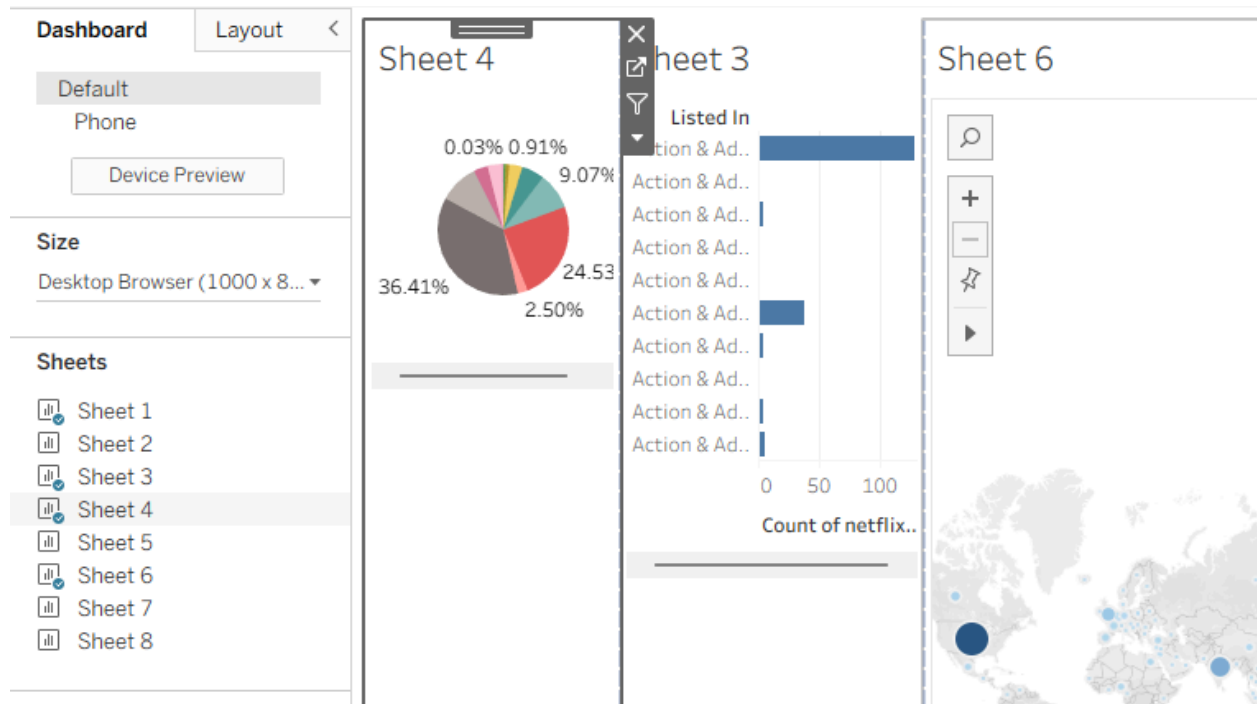

D. Create a Dashboard

- Create a new Tableau Dashboard.

- Add the charts created in the previous steps to the dashboard.

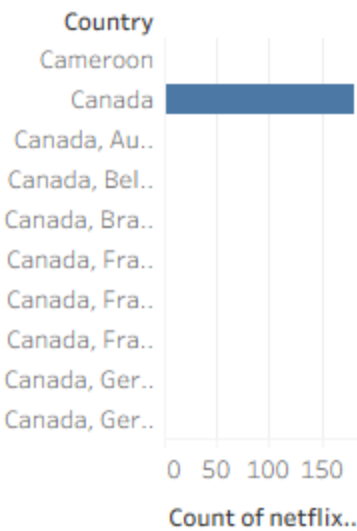

- Arrange the charts properly so that they are easy to understand.

E. Find Insights from the Data

• Which type of content is available more on Netflix: Movies or TV Shows?

Movies are available more on Netflix than TV Shows.

- Movies: **6,131**
- TV Shows: **2,676**

Therefore, **Movies are the most common content type** on Netflix.

• Which country has the highest number of Netflix titles?

United States has the highest number of Netflix titles.

• Which Rating has the highest number of titles?

TV-MA has the highest number of titles.

This indicates that a large portion of Netflix content is intended for mature audiences.

• Which year had the highest number of titles added to Netflix?

2019 had the highest number of titles added to Netflix in the commonly used dataset.

- **Which Genre has the highest number of titles?**

International Movies is the highest-count individual genre when the comma-separated genre field is split into individual genres.

If you did **not split listed_in**, your Tableau result may show a combined category such as **Dramas, International Movies** instead. Use the result shown in your own chart for your submission.

- **Which Movie duration range has the highest number of Movies?**

The **90–120 minute range** contains the highest number of movies.

This shows that most Netflix movies have a duration of approximately **1.5 to 2 hours**.

- **Write three conclusions about Netflix content based on your analysis.**

Conclusion 1

Netflix has a **larger collection of Movies than TV Shows**, indicating that movies represent the majority of the content in the analyzed dataset.

Conclusion 2

Netflix has a **diverse international content library**, with titles coming from many countries and covering various genres and ratings.

Conclusion 3

The year-wise analysis shows that Netflix **expanded its content library significantly over time**, with particularly high additions around 2019.

- **Write five important observations from your Tableau dashboard**

Movies are more numerous than TV Shows, with approximately 6,131 Movies compared with 2,676 TV Shows.

The United States has the highest number of Netflix titles, making it the largest contributor to the Netflix content library.

TV-MA is the most common rating, indicating that mature-rated content forms a significant portion of Netflix's library.

2019 recorded the highest number of titles added to Netflix, showing strong content expansion during that period.

Most movies have a duration between 90 and 120 minutes, making this the most common movie-duration range.
